	<b>Examiner</b> Sunil Singh	<b>Art Unit</b> 3672	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Skogberg et al. or Herron or Davis et al. (US 4509889, 4511289, 4636115).

Skogberg et al., Herron and Davis et al. all disclose a high-strength steel pipe rockbolt comprising an expansive rockbolt main body (11, 11,3) made from a shaped pipe having one or more concavities extending along an axial direction, the shaped pipe being made from a high-strength steel. Skogberg et al., Herron and Davis et al. all disclose the invention substantially as claimed. However, they all are silent about the thickness, tensile strength and elongation properties of the steel. It would have been considered obvious to one of ordinary skill in the art to modify either Skogberg et al., or Herron, or Davis et al. to use steel having the properties called for in claim 1 since based on design incentives such a modification would have yielded a predictable solution set with reasonable expectation of success.

With regards to claim 2, it would have been considered obvious to modify the steel by coating it with a Zn, Zn-Al or Zn-Al-Mg plating layer to avoid corrosion and provide desired strength.

Art Unit: 3672

With regards to claim 4, the recited method steps are considered obvious in view of the combination discussed above.

***Conclusion***
